ntri97543@gmail.com

Tan Phu District, HCMC

Skills

HTML,CSS

ReactJS,NodeJS (express)

SQL

Firewall,Router

Network(HTTP/HTTPS, TCP/UDP, DNS)

VritualBox,VMWare

Proxy,VPN

Linux

OSI, IP

Docker

Interests

Exploring new technologies
Reading books
Listening to music

Objective

Seeking an internship opportunity in the field of computer networking to apply my knowledge of TCP/IP, Routing, Switching, Firewall, and network security. In the short term, I aim to develop practical skills in configuring network devices, managing systems, and troubleshooting issues. In the long term, my goal is to become a professional Network Engineer capable of designing, deploying, and optimizing enterprise network infrastructure.

Education

Major: Information Technology (IT) 2023 - Present

Học Viện Hàng Không Việt Nam - Vietnam Aviation Academy

Networking Engineer

Projects

Network Lab Student 1/2024 - 2/2024

Configuring Router and Access Point Network

- Implemented a network model including Router and Access Point to provide Internet access for multiple devices.
- Configured IP address, DHCP, and Wi-Fi security.
- Tested and troubleshooted connectivity issues.

Backend 10/2025 - 12/2025

Expense Management System

- Developed the backend system for an Expense Management System to manage user income and expense data.
- Designed and implemented RESTful APIs to support expense tracking and reporting features.
- Ensured data integrity, security, and scalability of the backend services.
- Configured and connected IP addresses between servers to deploy and run the web application.
- Set up the server environment to ensure stable web deployment and accessibility.

20/10/2025 - 25/10/2025

Linux Container (LXC) Administration

- Took over and operated an existing Proxmox VE Cluster during a short IT handover period.
- Administered Linux Containers (LXC) to support internal systems and customer projects.
- Ensured system stability and service availability during container provisioning and migration.

Frontend 11/2025 - 1/2026

JobConect4Student

- Designed Figma prototypes for the project, including wireframes and high-fidelity mockups.
- Designed and improved UI/UX for the admin dashboard, and conducted usability evaluation after product completion.
- Updated and enhanced the product by adding necessary features based on user feedback and project requirements.
- Collaborated with team members to refine design consistency and ensure a smooth user experience across the system.

10/12/2025 - 17/12/2025

Virtual Machine Provisioning & Administration

- Designed, deployed, and operated virtual machines (VMs) using VMware to support development, testing, and internal systems.
- Managed virtualized environments to ensure stable performance and efficient resource utilization.
