Tan Phu District, HCMC

Skills

Communication

ReactJS,NodeJS (express)

Problem Solving

Firewall,Router

Network(HTTP/HTTPS, TCP/UDP, DNS)

VritualBox,VMWare

Proxy,VPN

Linux

OSI, IP

Docker

Interests

Exploring new technologies
Listening to music
Sports

Certifications

2025 IETLS

Objective

Seeking an opportunity in the field of computer networking to apply my knowledge of TCP/IP, Routing, Switching, Firewall, and network security. In the short term, I aim to develop practical skills in configuring network devices, managing systems, and troubleshooting issues. In the long term, my goal is to become a professional Network Engineer capable of designing, deploying, and optimizing enterprise network infrastructure.

Education

Major: Information Technology (IT) 2023 - Present

Học Viện Hàng Không Việt Nam - Vietnam Aviation Academy

Networking Engineer

Projects

Network Lab Student 1/2024 - 2/2024

Configuring Router and Access Point Network

- Implemented a network model including Router and Access Point to provide Internet access for multiple devices.
- Configured IP address, DHCP, and Wi-Fi security.
- Tested and troubleshooted connectivity issues.

Backend 10/2025 - 12/2025

Expense Management System

- Developed the backend system for an Expense Management System to manage user income and expense data.
- Designed and implemented RESTful APIs to support expense tracking and reporting features.
- Ensured data integrity, security, and scalability of the backend services.
- Configured and connected IP addresses between servers to deploy and run the web application.
- Set up the server environment to ensure stable web deployment and accessibility.

Frontend 11/2025 - 1/2026

JobConect4Student

- Designed Figma prototypes for the project, including wireframes and high-fidelity mockups.
- Designed and improved UI/UX for the admin dashboard, and conducted usability evaluation after product completion.
- Updated and enhanced the product by adding necessary features based on user feedback and project requirements.
- Collaborated with team members to refine design consistency and ensure a smooth user experience across the system.

Frontend-Backend 20/03/2025 - 22/03/2025

2026 GEMINI CERTIFIED

MealMatch

Designed and developed both **frontend and backend architecture**
Built responsive UI for collecting user input (budget, preferences, group size, time)
Developed RESTful APIs for processing user data and generating recommendations
Implemented **NLP-based input analysis** to extract user preferences from free-text
Built a **matching & scoring system** to rank restaurants and dishes
Extracted **popular dishes from user reviews** using keyword-based methods / AI
Implemented **explainable recommendations** (reasoning for each suggestion)
Integrated **Google Maps redirection** for seamless navigation to selected restaurants
